Introduction

Esco is the world leader in premium laminar flow clean benches for the global life sciences market. Since 1978, Esco has installed tens of thousands of laminar flow cabinets providing reliable protection for samples and work processes for a multitude of applications.

Esco laminar flow clean benches are the premium selection for the discerning researcher. Offering a combination of value, high quality construction, low operating noise levels in a wide product range to suit all budgets, from the industry leader.

Designed and Built for Enhanced Usability

Esco laminar flow clean benches incorporate a number of features to ensure operator comfort and enhanced productivity.

- The clean bench work surface is constructed of stainless steel, making the work zone easy to clean. The interior surface will not chip, rust or generate particles.
- The spillage-retention work top design with a recessed central area ensures that all liquid spills are contained.
- The ergonomically designed work surface with a curved front edge is designed for maximum operator comfort. A raised edge at the back of the work zone prevents spills from damaging the filter.
- The instant-start 5000k warm white lighting operates on an electronic ballast to reduce heat, improve comfort and conserve energy.

User-Friendly Control System

- Built-in solid state variable speed controller is superior to conventional "step" controllers and offer infinite adjustment from zero to maximum setting.
- Standard cabinet control system consists of separate switches for blower, lights, UV light (UV light switch is interlocked with the light and blower switch for enhanced safety), and socket plus a pressure gauge for filter monitoring.

Enhanced Filtration System

The enhanced filtration system on the AHC-B series is designed to provide the highest level of air quality within the work zone, meeting all relevant standards (see technical specifications for details).

- All Esco laminar flow clean benches provide ISO Class 3 air cleanliness within the work zone as per ISO 14644.1, significantly cleaner than the usual Class 5 classification on cabinets offered by the competition.
- High quality ULPA filters, utilizing an improved mini-pleat separation technique to maximize surface area improving efficiency and extending the life of the filter. ULPA filters operate at a typical efficiency of >99.999% on 0.1 to 0.3 micron sizes, providing superior protection over conventional HEPA filters.
- An additional disposable pre-filter on all models traps large particles in the inflow air prior to reaching the main filter, protecting it against damage and prolonging its life.
- Integral filter metal guard on the ULPA filter prevents accidental damage to the filter media; seamless filter gasket is permanently molded on the filter frame and will not deteriorate over time; aerosol (DOP/PAO) challenge test port included.

The Highest Quality Cabinet Construction

All Esco products are manufactured for the most demanding laboratory applications.
Laminar Flow Clean Benches • Horizontal Laminar Flow Clean Benches

- All components are designed for maximum chemical resistance and enhanced durability for a long service life.
- The main body of the clean bench is constructed of industrial-grade electro-galvanized steel.
- All cabinet components are clean room compatible.
- Isocide eliminates 99.9% of surface bacteria within 24 hours of exposure.
- Transparent tempered glass side panels enhance visibility and create a more comfortable work environment for the operator as opposed to conventional stainless steel or painted steel sides.
- Tempered glass is scratch and abrasion resistant, does not create particulates, and is easy to clean.

**Blower Efficiency**
- Esco laminar flow clean benches incorporate permanently lubricated direct drive centrifugal blowers.
- The energy efficient external rotor motor design reduces operating costs and has extremely low noise and vibration.
- The intelligent blower system compensates airflow as the filter becomes loaded, ensuring optimum efficiency and product protection.

**Designed and Built to Exceed Safety Criteria**
- All components used in Esco products meet or exceed all applicable safety requirements.
- Each cabinet is individually factory tested for safety and performance in accordance with international standards.
- UL listed or UL recognized, electrical components ensures superior electrical safety for the operator.
- All Esco laminar flow clean benches meet general safety requirements set by independent testing laboratories (see technical specifications for details).
- Esco AHC models have been type-tested to the EN 12469:2000 for cross-contamination and product protection using microbiological testing methods.

**Warranty**
- All Esco Airstream laminar flow clean benches come with an extended 3 year warranty, excluding consumable parts. Contact your local representative for specific warranty details.

**Accessories and Options**
- Esco offers a variety of options and accessories to meet local applications. Contact Esco or your local Sales Representative for ordering information.
- Support stands
- Electrical outlet, ground fault
- Petcock (air, gas, vacuum)
- Germicidal UV lamp
- Transparent front cover for UV protection
- PVC armrest
- Height-adjustable lab chair
- Ergonomic foot rest
- IV Bar, with hooks

**Standards Compliance**

### Model AHC (B-Series) Airstream Horizontal Laminar Flow Clean Bench Technical Specifications

1. Tempered glass side panel
2. ULPA filter
3. Pre-filter
4. Blower
5. Fluorescent lamps
6. Standard IV bar Retrofit Kit provision
7. Optional front cover for UV protection
8. Standard UV light Retrofit Kit provision
9. Service fixture Retrofit Kit provision (2 holes on each side)
10. Pressure gauge
11. Operating switches
12. Stainless steel work top

Esco Containment, Clean Air and Laboratory Equipment Products

Biological Safety Cabinets, Class II, III
Fume Hoods, Conventional, High Performance, Ductless Carbon Filtered
Laminar Flow Cabinets, Horizontal, Vertical, PCR
Animal Containment Workstations
Hospital Pharmacy Isolators, Cytotoxic Safety Cabinets
Specialty Workstations: In-Vitro Fertilization, Powder Weighing
PCR Thermal Cyclers, Conventional, Real-Time
Cleanroom Fan Filter Units, Modular Rooms, Air Showers, Pass Thrus

Since 1978, Esco has emerged as a leader in the development of controlled environment, laboratory and cleanroom equipment solutions. Products sold in more than 100 countries include biological safety cabinets, fume hoods, ductless fume hoods, laminar flow clean benches, animal containment workstations, cytotoxic cabinets, hospital pharmacy isolators, and PCR cabinets and instrumentation. With the most extensive product line in the industry, Esco has passed more tests, in more languages, for more certifications, throughout more countries than any biosafety cabinet manufacturer in the world. Esco remains dedicated to delivering innovative solutions for the clinical, life science, research and industrial laboratory community. www.escoglobal.com.
